

# Vecta+ Shower Panel Range

The Vecta+ Shower Panel range are light weight, surface mounted and pre-plumbed ready to be installed. Perfect as retrofit or new build installations. The range includes a hygienic non-touch sensor activated panel (SSPV) and a traditional mechanical push-button panel (MSPV). Both of these models include a sustainable 8lpm flow rate regulator as standard, with the water set to continually flow for 30 seconds, to reduce water wastage, increase efficiency and save energy, while offering a more sustainable, economical, commercial shower. Furthermore, these sleek slim-line showers have a patented 42 pin shower head nozzle fitted as standard, to reduce limescale damage on the shower head and gives users a rain effect shower experience.

This stylish range has concealed fittings within the panel, making general maintenance easy. In addition, they are offered with an exceptional 10 year manufacturing warranty, providing the confidence that these are built to last.

## Unique selling benefits

- Sensor or push-button models available
- **Save** - product payback in as little as 4 months
- **Sustainable** - 8lpm flow regulator installed and a 6lpm flow regulator included in the box
- **Easy to install** - light weight, surface mounted and pre-plumbed ready to install
- **Mains and battery power** options out the box
- **Anti-vandal Safety shutoff** - flow time set to ~30 seconds as default
- **Patented shower head nozzle** - reduces scale damage on the shower head
- **Rain effect** - 42 shower head needles for a rain effect shower experience
- **Slim-line and sleek** - with concealed fixings and slim shower panel body
- **Hygiene flush setting** - to prevent the potential build-up of stagnant water, which can create legionella bacteria growth (SSPV only)
- **Easy to maintain** - general maintenance doesn't require dismantling of the complete shower panel

**10** YEAR  
extended  
warranty

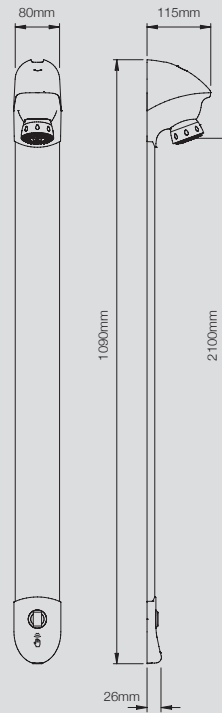

## Vecta+ Sensor Shower Panel

The Vecta+ Sensor Shower Panel is light weight, surface mounted and pre-plumbed ready to be installed. Perfect as retrofit or new build installations, this slim, stylish, light weight design can easily be installed.

### Technical information

- **Dimensions** Width 80mm, Height 1090mm, Depth 115mm
- **Mounting requirements** Vertically mounted
- **Sensor range** ~18cm
- **Run-on time** 30 seconds of continuous water flow via sensor activation, the shower will automatically stop to reduce the risk of flooding
- **Hygiene flush setting** – deactivated by default and can only be activated at Cistermiser (must be confirmed on order from client)
- **Battery requirements** 6V from either 1 CRP2 battery or 1 223 battery, or 230V AC to the supplied power transformer via a fused spur
- **Battery life** 3 years in normal conditions with recommended batteries. A single red flashing of the LED indicates the batteries are low and need to be replaced
- **Electronic specification**  
**Power transformer** Input voltages: 230V AC 50/60Hz  
 Output voltages: 7V DC 0.15A MAX

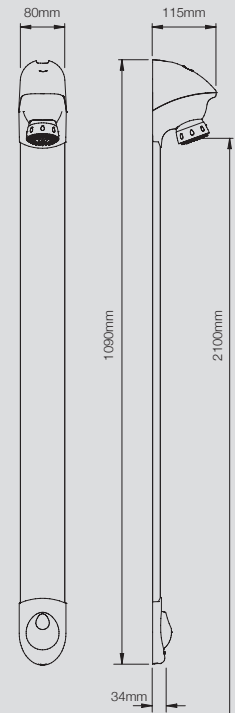

## Vecta+ Mechanical Shower Panel

The Vecta+ Mechanical Shower Panel has a traditional mechanical push-button configuration. Light weight, surface mounted and pre-plumbed ready to be installed, these are perfect as retrofit or new build installations.

### Technical information

- **Dimensions** Width 80mm, Height 1090mm, Depth 115mm
- **Mounting requirements** Vertically mounted
- **Push-button** the water flow is activated when the user pushes and releases the push button
- **Run-on time** 30 seconds (-10/+5) of continuous water flow via push button activation, the shower will automatically stop to reduce the risk of flooding

## Installation

- Operating pressure: minimum 1 bar (dynamic), maximum 5 bar
- Power: Battery and Mains options included as standard out of the box (SSPV only)
- Pipe fitting requirements (inlet and outlet diameter): 15mm G1/2

## Regulatory and Compliance

- WRAS: Approval pending
- BREEAM: Wat 1 (8lpm flow regulator fitted, 6lpm in the box)

## Additional Parts / Optional Extras (additional costs apply)

- Right angle stop valve and joint filter (SH/4)
- MSPV Shower Head Service Pack (SH/3)
- SSPV Shower Head Service Pack (SH/2)
