

Cistermiser
OUR WORLD IS WATER

Saving Water **Saving Energy** **Supporting** **Sustainability**

Innovative water and energy-saving solutions for commercial washrooms.

For nearly 50 years, Cistermiser has been helping organisations reduce water consumption, lower energy demand, cut carbon impact and improve hygiene and compliance, delivering intelligent, reliable washroom controls that support long-term sustainability goals.

Our solutions are designed specifically for commercial and public sector environments, delivering measurable efficiencies at scale.

Part of the  **GENUIT**
GROUP

Designed to save water, energy and cost

Cistermiser designs and manufactures intelligent washroom control solutions that help buildings operate more efficiently, reducing water waste, lowering energy demand and supporting sustainable building performance.

Our products are trusted across education, healthcare, leisure, commercial and public sector environments, delivering measurable resource savings without compromising hygiene, reliability or user experience.

Our Product Range

Urinal Flushing Solutions

Smart, demand-led flushing systems that dramatically reduce unnecessary water usage while maintaining hygiene standards, ideal for high-traffic washrooms.

- Hydraulic Valve
- Infrared Control IRC® Valve
- Direct Flush Valve

W/C Flushing Controls

Innovative flushing solutions designed to optimise water use, reduce wastage and support compliance across commercial washrooms.

- EasyflushEVO
- Easyflush Direct

Infrared Taps

Touch-free tap solutions that improve hygiene, minimise water use and reduce hot water demand, delivering both water and energy savings.

- Vecta+ Sensor Tap
- Vecta+ Sensor Mixer Tap
- Vecta+ Sensor Spout
- Novatap

Built for commercial environments

- ✓ Robust and reliable
- ✓ Easy to install and maintain
- ✓ Designed for long service life
- ✓ Suitable for new build and retrofit projects
- ✓ Supports water, energy and carbon reduction goals

Supporting sustainable buildings at every touchpoint

Cistermiser products are engineered to help organisations meet sustainability targets by addressing one of the biggest areas of avoidable waste in buildings, washroom water and energy use.

Shower Controls

Flow-regulated and timed solutions that help reduce excessive water and energy use, particularly in leisure, education and residential settings.

- Vecta+ Sensor Shower Panel
- Vecta+ Mechanical Shower Panel

Washroom Controls

Intelligent control systems that manage water use across multiple outlets, delivering efficiency, consistency and compliance at scale.

- Sensazone

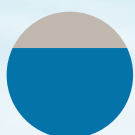

Limescale Prevention

Non-chemical limescale prevention solutions that protect systems, extend product life and maintain efficiency — reducing maintenance, downtime and waste.

- Combimate

Sustainability in action

- ✓ Reduced water consumption
- ✓ Lower hot water usage = reduced energy demand
- ✓ Reduced carbon impact
- ✓ Longer product lifespan and reduced maintenance
- ✓ Supports ESG and sustainability strategies

Cistermiser
OUR WORLD IS WATER

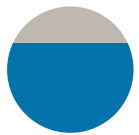

As part of **Genuit Group PLC**, Cistermiser plays an active role in supporting the Group's commitment to responsible resource use and sustainable innovation.

Delivering efficiency ...that lasts

Simple solutions. Proven performance. Real impact.

Discover how Cistermiser can help reduce water and energy use while supporting long-term sustainability goals across your buildings.
